

Session 2023-2024 (1st June, 2023 to 31st May, 2024)

Students Week Celebration:

Students' Week is celebrated in West Bengal from **January 2nd to 8th every year**. The week is celebrated across the state in different schools, colleges, universities, and districts by performing different thought-provoking events for the students.

Gurudas College has also participated in this event. In our Dept of botany several events such as Students seminar, Parent Teacher Meeting, Poster presentation was organised. Also, there is a lab visit for the school students of Dr. Shyamaprasad Mukherjee Institution. One of the faculty from the institute also visited with the students. Every event was organised keeping in mind the interactive value of the students.

1. Parent teacher Meeting

A successful Parent-Teacher Meeting was held on **6th January, 2024** at the Department of Botany, Gurudas College, where all the faculty members and students came together with their parents to discuss academic progress and growth. The students of Semester I and III participated in the meeting. The meeting provided a valuable platform for parents to interact with the faculty and gain insights into their child's performance, strengths, and areas of improvement. The students, accompanied by their parents, actively participated in the discussions, enabling a comprehensive understanding of their academic journey. The faculty members offered constructive feedback, guidance, and support, while also outlining strategies for students to excel in their studies. Overall, the meeting fostered a collaborative environment, promoting a strong partnership between parents, teachers, and students.

2. Laboratory Visit by the school students

On 8th January, 2024 the school students visited the laboratory of Botany dept. All the faculty took active participation in this event. Prof. Monalisa Roy, Dr. Anwesha Biswas, Dr. Gautam Kumar Pahari explained the student about plant diversity and about different groups of plants and also showed the students slides under microscope related to that. The students were also shown the jar specimen to make them understand about different types of fruits, inflorescence, etc. Further, Dr. Pahari explained them the techniques of herbarium preparation and its procedure. Dr. Mousumi Das and Dr. Moumita explained about different if and butts of microbiology experiment.

3. Students Seminar

The student seminar, held on **8th January, 2024** showcased a diverse range of topics, with a notable emphasis on botany and its application. Students of Semester III participated in this event. The curriculum-aligned topics enabled students to simultaneously review course material and prepare for their upcoming exams, reinforcing their grasp of fundamental concepts. The presentations delved into the fascinating applications of botanical concepts in various fields, including forensic science, agriculture, and environmental sustainability. Specifically, the topics covered included the role of palynology in forensic science, the significance of seeds, biofertilizers, and inflorescence in modern agriculture, as well as the importance of melissopalynology, the study of pollen in honey, in understanding bee behaviour and environmental health. Additionally, students explored the intricacies of ovules, placentation, and other reproductive structures in plants, demonstrating a deep understanding of botanical principles and their practical applications. Overall, the seminar highlighted the students' mastery of complex botanical concepts and their ability to think creatively about the ways in which these concepts can be applied to real-world problems.

4. Poster Presentation

The students of Semester V Botany Honours actively participated in a poster presentation held on **January 8th, 2024**. The topics were thoughtfully selected from the curriculum, enabling students to reinforce their understanding of key concepts while preparing for their upcoming exams. The presentations primarily focused on the fascinating realms of Cell and Molecular Biology and Plant Biotechnology. Specific topics included the intricacies of Somatic embryogenesis, Endosperm and Embryo culture, Ribozyme and alternative splicing, among others. To foster a competitive and learning-rich environment, faculty members were present to judge the presentations, providing constructive feedback and encouragement to the students. This engaging exercise not only showcased the students' grasp of complex biological concepts but also helped them develop essential skills in scientific communication, critical thinking, and creativity.
