On 30th August, 2024 the Department of Botany organized an excursion to **Subhas Sarovar, Belegkata**, for 2nd Semester students (Hons and Gen) (18 in number), CCF accompanied by faculty members Dr. Mitu De and Dr. Ripan Chandra Das. The excursion aimed to conduct taxonomical and systematic studies of the area's flora and fauna. Students observed, collected, and identified various plant species, including aquatic plants, trees, shrubs, etc. Guided by faculty, students learned about classification systems, binomial nomenclature, and species identification based on morphological characteristics. The excursion provided hands-on experience, enhancing students' observational and analytical skills, and the department plans to organize more such excursions in the future.
