Seminar Report on Recent Trends in Computer Science:

A **Student Seminar on Recent Trends in Computer Science** was organized by the Department of Computer Science on **13 January 2026**. The event witnessed active participation from **11 students of Semester 1 and Semester 3**, who presented seminars on emerging and relevant areas of computer science.

The topics covered during the seminar included **Data Warehouse and Data Mining**, **Voice over IP (VoIP)**, **Quantum Computing**, **Human–Computer Interface (HCI)**, and **Cloud Security Management**. The presentations were informative and helped students gain insights into modern technologies and their practical applications. The sessions also encouraged interaction through questions and discussions.

Based on overall performance, presentation skills, and subject understanding, prizes were awarded at the end of the seminar. **Anuksha Mandol** secured the **1st position**, followed by **Ayush Chandra Roy** as **2nd**, and **Arghya Ghosh** as **3rd**.

The seminar was successful in enhancing technical knowledge and boosting confidence among the participating students, making it a meaningful academic event for the department.
