

Experiential Learning at North Bengal

The students of Semester II, IV, and VI (Major)(total 22) embarked on an experiential learning trip to Dooars, Lava, Lolegaon and Lataguri from 18th to 23rd May 2025, guided by Dr. Ripan Chandra Das, Dr. Goutam Kumar Pahari, and Dr. Suptotthita Choudhury. The trip provided a unique opportunity to explore the region's rich floral diversity, different forest types, and unique vegetation of various plant families. With hands-on experience in field techniques, such as plant collection and identification, the students gained a deeper understanding of ecological concepts, including adaptation, succession, and conservation. Interactive sessions with local experts and guides offered valuable insights into the local flora and its uses. The trip also facilitated teamwork and communication skills through shared experiences and group discussions. Overall, the trip was a resounding success, providing students with a holistic learning experience that complemented their academic curriculum and fostered a deeper appreciation for the natural world. The experience is expected to have a lasting impact on their academic and professional pursuits.
